#366

*Betula pumila*
(Bog Birch)
- 3 to 6 feet tall
- Prefers moist, acidic soils
- Sunny to light shade

#326

*Bidens cernuus*
(Nodding bur-marigold)
- 4 to 40 inches tall
- Full or partial sun and moist soil
- Blooms late summer to early fall
- Forms colonies by reseeding itself
- Attractive to many species of bees and butterflies

#327

*Bidens coronatus*
(Tall swamp-marigold)
- 6 to 60 inches tall
- Wet soils
- Blooms late summer to early fall with two inch yellow flower heads
Bouteloua curtipendula
(Side oats grama)
- 1 to 2 feet tall
- Dry soil and full sun
- A hardy, medium-sized bunch grass that produces interesting side-flowering stalks in late summer.

Bromus ciliatus
(Fringed brome grass)
- 2 to 4 feet tall
- Moist soil and sun
- In June and July the seed head arches over and turns light brown.
- Provides cover, nesting, and food for wildlife.

Bromus pubescens
(Canada brome)
- 2 to 3 feet tall
- Moist soil and shade
- Downy dark green foliage with arching seed heads.
- Seeds eaten by birds

#303  
**Carex crinita**  
(Sickle sedge)  
- 3 to 4 feet tall  
- Wet to moist soils and fully sun  
- A very handsome, robust sedge with thin elongate drooping spikes emerging in late spring to early summer.

#304  
**Carex hysterica**  
(Sedge)  
- 0.5 to 1.5 feet tall  
- Wet to moist soils and full sun  
- A short wetland species that produces notably thick pendant spikes in late spring.

#108  
**Carex muhlenbergii**  
(Sand bracted sedge)  
- 1 to 2 feet tall  
- Dry soil and full to partial sun  
- Seed head opens May-June  
- Provides food for birds
#205
*Carex pensylvanica*  
(Pennsylvania Sedge)  
- 0.5 to 1 foot tall  
- Moist soils with shade or part sun  
- Tough grass for shady ground cover, grows very well with oak trees.

#308
*Carex prairea*  
(Prairie sedge)  
- 1 to 2 feet tall  
- Moist soil and full sun  
- This delicate, highly clumped sedge has narrow leaves and is a long-lived perennial.  
- Seeds are eaten by birds, especially waterfowl.

#384
*Carex retrorsa*  
(Knotsheath sedge)  
- Grows 1 to 3 feet tall  
- Attractive brown seed heads remain intact through the fall months  
- Prefers sun to shade in moist soils
#279

**Carex sparganioides**  
(Woodland Sedge)
- 1 to 3 feet high
- Moist, medium soil and full shade
- An ornamental grass with dark green foliage and a green flower, usually found in hardwood or mixed forests.

#312

**Carex stricta**  
(Tussock sedge)
- 2 to 3 feet tall
- Moist soil, shade.
- Grows in tufts.
- Collects water as the tufts increase, allowing other water plants to grow.

#379

**Carex vulpinoidea**  
(Fox Sedge)
- 3 feet tall
- Moist soil and full sun
- Strong clump dense
- Clumping grasses
#368
*Cephalanthus occidentalis*  
(Buttonbush)
- Grows 3 to 8 feet tall
- Full or partial sun, fertile soil in wet conditions
- Spherical flower head about 1–1½" across, covered with small sweetly fragrant flow-

---

#250
*Cercis canadensis*  
(Eastern Redbud)
- 20 to 30 feet tall
- Full to partial sun and moderate soils
- Bright pink flowers bloom in the spring

---

#386
*Chamerion angustifolium*  
(Fireweed)
- Grows 3-7 feet tall
- Clusters of pink flowers
- Aggressive in a moist garden
- Valued source of nectar for bees
#214

**Cinna arundinacea**  
(Wood reed grass)
- 3 to 5 feet tall
- Moist soil, part shade
- Leaf blades up to 12 inches long, and are a grayish green color.
- Flowers droop from stem.

#331

**Clematis virginiana**  
(Wild clematis)
- Scrambling vine
- Moist soil and full sun
- This native vine is a great plant for trellises, fences, or as an addition to any moist site.
- White flowers are pollinated by butterflies and moths.

#130

**Coreopsis lanceolata**  
(Lance-leaved coreopsis)
- 1 to 2 feet tall
- Dry soil and full sun
- This persistent prairie perennial flowers in spring with unusually bright yellow heads.
#131
Coreopsis tripteris  
(Tall coreopsis)
- 5 to 7 feet tall
- Varied soils and partial sun
- The yellow flowers bloom in August and September.
- Attracts birds and butterflies.

#167
Cornus racemosa  
(Gray Dogwood)
- 3 to 8 feet tall
- Moist soils and partial to full sun
- The cream flowers bloom late spring/early summer; fruit is bright red
- Vegetative offsets produced from underground runners;

#370
Cornus stolonifera  
(Red-stemmed dogwood)
- 6 to 12 feet tall shrub
- Full sun and wet soil
- Produces creamy white flowers in the spring followed by creamy white berries.
- Drought resistance and can form dense hedges.
- Stems turn red in late summer to early fall
### #333
**Desmodium canadense**  
(Showy tick-trefoil)
- 2 to 4 feet tall
- Moist soil and full sun
- The magenta flowers bloom in June and July. The seed pods are sticky.
- Attracts bees and hummingbirds

### #181
**Desmodium paniculatum**  
(Panicled tick trefoil)
- 2 to 4 feet tall
- Partial to full sun and dry soils
- Pink pea-like flowers bloom from mid-summer to early fall
- Produces glabrous seedpods that cling to fur and clothing
- Important food source for many insects and an-

### #207
**Diarrhena obovata**  
(Beak grass)
- 2 to 3 feet tall
- Moist soil and shade
- Very attractive dark green grass with shiny foliage.
- Brown seeds are eaten by birds in the summer.
**#132**

*Echinacea purpurea*  
(Purple coneflower)
- 2 to 4 feet tall
- Dry soil and full sun
- The showy pink and orange flowers bloom in July. An easy-to-grow plant.
- Attracts butterflies and birds

---

**#383**

*Echinocystis lobata*  
(Wild Cucumber)
- Vine that grows 2 to 10 feet tall
- Partial to full shade with moist soil
- Vigorous annual vine with star-shaped leaves
- Small white flowers turn to round, spiny seed pod in late summer

---

**#112**

*Elymus canadensis*  
(Canada wild-rye)
- 2 to 4 feet tall
- Dry soil and full sun
- Wheat-like seed head appears in July.
- Provides cover, nesting, and food for wildlife.
#206

*Elymus riparius*  
(Riverbank wild-rye)

- 3 to 4 feet tall
- Moist soil, varied sunlight.
- Dark green leaves and yellow flowers
- Active growth in spring and summer, blooming midsummer.

#208

*Elymus virginicus*  
(Virginia wild-rye)

- 2 to 4 feet tall
- Moist soil and part shade
- Good grazing for wildlife, provides animal habitat and attracts butterflies

#113

*Eragrostis spectabilis*  
(Purple love grass)

- Up to 1 foot tall
- Dry soil and full sun
- This drought-tolerant grass has foliage that turns red in the fall. Seed heads break off and “tumble.”
- Seeds are eaten by birds.
**#334**  
*Eryngium yuccifolium*  
(Rattlesnake master)  
- 2 to 4 feet tall  
- Varied soils and partial sun  
- The button-like white flowers bloom in July and August. The leaves are yucca-like.  
- Attracts butterflies.

**#254**  
*Euonymus obovata*  
(Running Strawberry Bush)  
- Likes moist soil and shade areas  
- Great ground cover for woodland gardens  
- Attractive red fruit

**#335**  
*Eupatorium maculatum*  
(Joe-pye weed)  
- 4 to 5 feet tall  
- Moist soil and full sun  
- Dark purple stem and whorled leaves complement the pink flowers of this very handsome plant  
- A butterfly magnet!
Eupatorium perfoliatum  
(Common boneset) 

- 2 to 4 feet tall 
- Moist soil and full sun 
- The delicate white flowers bloom in August and September. 
- Attracts butterflies and beetles
