**Background/Context:** There is a great need for a school in the village Alale in western Kenya. Currently the closest one is over 100 km away, and traveling to and from the school is very dangerous. A girl’s high school is currently under construction in Alale and RCA Missions is looking for a facility for boys.

**Objective:** Sifuni Mungu’s senior design project is to design a boy’s high school and dormitories for the village of Alale. The facility will also be designed to collect and treat rainfall runoff. RCA Missions will be funding the project once the design is complete.

**Team members:** Ben Dykema, Brandon Van Dyk, Charles Blum, Steve Kranenborg, Marcus VanderBrug
