What is Home Automation?

The automation of the home or household activity to provide improved convenience, comfort, energy efficiency and security. The possibilities include:

- Lighting
- Entertainment
- Appliances
- Heating, Ventilation, and Air Condition (HVAC)
- Doors & Gates
- Security

Possibilities

Leading Smart Home Systems

The smart home market was valued at $33 billion in 2013, and is expected to boom to $71 billion by 2018 according to Juniper Research.

HomeAlive System

"Imagine controlling any device from the palm of your hand. Any electronic device in one’s home can be controlled wirelessly; combined with scheduling, voice commands, and devices talking to other devices, the possibilities are endless!"
