The Company was incorporated in August 2003 under the Laws of the Federal Republic of Nigeria and is jointly owned by DeltaTek Engineering Limited (100% Nigerian Engineering Company) and WorleyParsons. DeltaAfrik Engineering Limited is a world class project delivery company with vast experience in the Oil & Gas, Power and Infrastructure & Environmental sectors.

**Deliverables learned**

I learned for the first time about:
- Process Flow diagrams (PFDs)
- Piping and Instrumentation Drawing (P&IDs)
- Line listing
- Line and equipment sizing
- Master Deliverable Register (MDR) also known as Document Deliverable Register
- Well heads
- HYSYS/UNISIM

**Project worked on**

- I worked as a process engineering intern in the company. The work required a working knowledge and great understanding of the processes that take place in the plant.
- Project involved building multiphase flow meter
- Was one of the first of its kind in Africa
- Was involved in brainstorming process for project
- Went for kick off meeting to learn about how much safety and planning was involved.
- Made some conceptual design drawings on AutoCAD
- Made some conceptual design simulations using HYSYS software

**Pictures from work**

- Working on a P&ID on AutoCAD
- HYSYS simulation

**Acknowledgment**

I would like to thank Mr. Olusegun Ademoyegun, my direct supervisor, Mr. Tony Nwazosa, my project manager and the whole engineering department for providing me with such a valuable internship experience.
