Connecting the Rapid with Outdoor Activity Hot Spots
Kent County, MI

This map highlights many outdoor activity hot spots (OAHS) found within the Grand Rapids area. Some of the OAHS are already accessible by public transportation via The Rapid. Examples include Reeds Lake where there is ample fishing opportunities, and Lamberton Lake Fen where there is a beautiful nature trail around the lake. However, there are many of these great OAHS that are outside current Rapid routes. This map proposes six extensions for current rapid routes. These six extensions would give Rapid riders access to four great city parks, three great nature trails, and one great fishing spot. Inset 1 and Inset 2 highlight two key proposed extensions. Each of these extensions would give access to two great city parks where the outdoor activities range from hiking to disc golf.
