Parking at Calvin College has been taxed due to the construction of the Venema Fieldhouse. In response to this issue, it is proposed that Calvin expands its Go!Calvin shuttle service. Currently Go!Calvin is only offered to students living at the Glen Oaks Apartment complex. This map shows the density of off campus commuter students in green. This density indicates a large percentage of Calvin students living in Easttown and just West of Calvin's Campus. The proposed Go!Calvin routes will encompass these areas. Actual route schedules would be centered around the :50 minute class schedule so that shuttles would arrive on :50 past the hour and leave at :10 past the hour. In addition, to make the DeVos, Prince and Spoelhof parking lots more accessible and to benefit on campus students, it is proposed that a shuttle be started that continuously circles the campus. This shuttle will have several prominent stops in order to accommodate all students. The Commons Annex would serve as a the Central Station from which all shuttles operate.
