NSF Funded REU Program

Undergraduate Computer Research at Oakland University

May 19th – July 23rd 2004

The Computer Science and Engineering Department at Oakland University invites students to apply to its third summer of an NSF-funded Research Experience for Undergraduate students. The students selected to participate will be immersed in a research environment under the mentoring of CSE faculty. This program is a full-time comprehensive educational experience targeted to women in particular. It should be understood by the students that this position is not merely a summer job, but rather an educational experience where the students are treated as junior colleagues. Participants will receive a stipend of $3,600 for the ten weeks, meal allowance, and travel subsidy for either travel to and from the program or to attend a conference.

Program features:

• 10 weeks full time research program from May 19th through July 23rd. Students cannot be working or taking classes at the same time.

• Research in teams of 2 under close supervision by CSE faculty.

• Variety of research topics available in Intelligent Information Engineering.

• Students receive a stipend of $3,600, meal allowance, and travel subsidy to attend a conference.

Requirements:

• Open to all non-graduating undergraduate students (US citizens and permanent residents) with an interest in Computer Science and Engineering

• Students will be selected based on statement of interest, GPA and letters of recommendation.
