Christian Education: Teaching & Learning with Technology Workshop
Led by: Kara Sevensma

Workshop Description:
We find ourselves at a technological crossroads in education. Digital technologies are shaping teaching and learning, and with the unprecedented pace of change it becomes challenging to see beyond the next junction. We begin to focus on the technology — the next, newest, fastest, and updated devices and software — and lose sight of how our knowledge of pedagogy should be driving the use of technology. Educators must make critical decisions about how, when, and why they will use technology. How does technology enhance Christian pedagogy? How can educators leverage technology to promote flourishing and shalom? What frameworks should guide teaching and learning with digital technologies?

This workshop will allow candidates to deepen their understanding and use of educational technology through readings, videos, discussions, virtual field trips, and hands-on technology explorations. The workshop will place an emphasis on understanding current frameworks and models for thinking about educational technology. Candidates will also explicitly consider how technology affords novel opportunities for enhancing Christian pedagogy.

The workshop will be a hybrid format with 2 days online and 2 days on-campus.

Workshop Format, Dates, & Times:
Participants will meet once every three weeks from September to November. The 2-credit workshop is a hybrid course, combining online and on-campus experiences to create an engaging learning experience with ease of access.

Day 1 Online: To be completed any time between June 20th & July 8th
Day 2 July 21: 9:00am – 4:00 pm On-campus
Day 3 July 22: 9:00am – 4:00 pm On-campus
Day 4 Online: To be completed any time between August 8th & 20th

Workshop Cost:
Individual cost for the 2-credit workshop is just $530.00.
