

Teaching & Learning Project Proposal Rubric

	1	2	3	4
Purpose	No defined purpose	Purpose defined, with signification communication needed	Purpose defined with some clarification needed	Clearly defined purpose
Longevity	One year	Two years	Three years	Four plus years
Number of students	0-25	26-75	76-100	101+
Impact on student learning	None	Low - an administrative or functional tool	Moderate - improved delivery method of material	High - engages students in active learning opportunity
Originality	Common	Somewhat innovative	Innovative	Groundbreaking
Reusability/Sustainability	Not reusable	Reusable with significant help from T&L	Reusable with some help from T&L	Easily reusable with no help from T&L
Adaptability	Can not be adapted	Adaptable with significant T&L help	Adaptable with some T&L help	Adaptable with no T&L help
Scalability	Not scalable	Scalable with significant help from T&L	Scalable with some help from T&L	Easily scalable with no help from T&L
Cost Range	\$1000+	\$750-\$1000	\$500-\$750	\$0-\$500
Availability of resources	Key resources unavailable	Resources available with significant cost or effort	Resources available with some cost of effort	All resources readily available
KV or CMS integration	Project cannot integrate	Project can integrate with significant cost or effort	Project can integrate with some cost or effort	Project fully integrates
Faculty KV or CMS experience	None	Low	Moderate	High

Criteria Definitions

- **Purpose** - The goal of the project, including the problem the project solves.
- **Longevity** - Anticipated life span of a proposed project.
- **Number of students** - Number of students impacted by project in a given semester.
- **Impact on student learning** - Level of active engagement the project provides to students.
- **Originality** - Purpose of project is unique enough to warrant development. (Are there pre-existing solutions to this problem?)
- **Reusability/Sustainability** - Project can be reused by sponsoring instructor in one or multiple courses over time.
- **Adaptability** - Project can be adapted for use by another instructor, possibly in another discipline.
- **Scalability** - Potential for growth (content, number of users, etc...).
- **Cost Range** - Total cost for student wages and software/hardware needs.
- **Availability of resources** - Resources needed to complete project (T&L project manager, student consultant availability and their skill set, hardware, software).
- **KV or CMS integration**
- **Faculty KV or CMS experience**
