

Spectrum Furniture's Media Manager Lectern

For further assistance, call the HelpDesk at x6-8555

**Audience/Classroom
Side**

**Presenter
Side**

Internally the Media Manager Lectern is spacious enough to hold a full complement of rack rail equipment, house a tower CPU, and provide a secure place to store a laptop and document camera. Externally it has ample room on the work surface for laptop computers and most other peripheral equipment.

When not in use:

- * The **keyboard tray** is stored beneath the lectern's top. To use the keyboard, grip the keyboard tray with two hands, and pull it out from under the desktop. There is a flip-down wrist rest that is meant to provide comfort while typing.
- * Fold the flip-up document camera/**task shelf** down.
