These instructions are for FireFox 5.x or higher

1. Open Google Chrome
2. Click the Customize button (wrench icon in the top right corner) and choose Options
3. Click Under the Hood in the Options menu on the left, then the Content Settings button in the Privacy section
4. Scroll down to the Pop-ups section and click the Manage Exceptions... button
5. In the Add a new hostname pattern field, enter calvin.edu and hit your Enter/return key. Now type waypoint.calvin.edu in the Add a new hostname pattern field and hit your Enter/return key.
6. Close the Options - Content Settings tab
