SETTING YOUR SAFARI POP-UP BLOCKER TO ALLOW *.CALVIN.EDU

These instructions are for Safari 5.x or higher

Safari does not allow for individual website exceptions. Instead you must turn off the pop-up blocker when using Colleague. We recommend turning it back on when you are done using Colleague.

1. Open Safari
2. Click the Safari menu and click Block Pop-Up Windows (so that the option is not checked)
3. To turn the pop-up blocker back on, repeat step 2 so that the Block Pop-Up Windows option is checked
