

## THE PYTHAGOREAN THEOREM

Below are three sets of pieces to replace those from the kits in case you don't have a kit.

1. Cut out the triangles and squares.
2. Arrange the pieces from each set to form a single large square.
3. Arrange the pieces from each set to form two squares next to each other (In an L shape). The two squares will have sides the same lengths as the two short sides of the triangles.
