1. Two variables at a time. Three cases:

2. Explanatory and response variables.

3. One categorical and one quantitative variable.
   (a) Useful plots.

   (b) Aside - important R concept - formula (See SimpleR page 35)
       `boxplot(y ~ x)`

   (c) "Explaining" variation.

Homework
1. Read Chapter 5.
2. Practice problems (due Monday, February 15) 5.11,13,17,21
3. Problems to turn in (due Tuesday, February 16) 5.32,36
