Are you taking Zetia® (ezetimibe) or Vytorin® (ezetimibe/simvastatin)?

If so, you may be worried about recent news stories questioning the benefit of these medicines... on the basis of a single study that has generated a lot of confusion.

In fact, ZETIA and VYTORIN have been proven to lower LDL (bad) cholesterol along with diet in multiple clinical studies involving thousands of patients. Both the American College of Cardiology and the American Heart Association agree that lowering bad cholesterol is important.

All of us at Merck and Schering-Plough proudly stand behind the established efficacy and safety profiles of ZETIA and VYTORIN.

If you have high cholesterol, follow your doctor’s recommendation on whether or not you should be taking a cholesterol-lowering medicine.
